

# MISSION CONSERVATION ACTIVITY GUIDE

June 2025 – Pollinators

Hello agents! This week's theme for Mission Conservation is pollinators. Pollinators are creatures that pollinate trees and flowers. While we mostly think of bees when we think of pollinators, many other creatures can pollinate as well! Butterflies, moths, hummingbirds, and even lemurs are known pollinators.

## **Outdoor Activity: Pollination City**

### **Materials:**

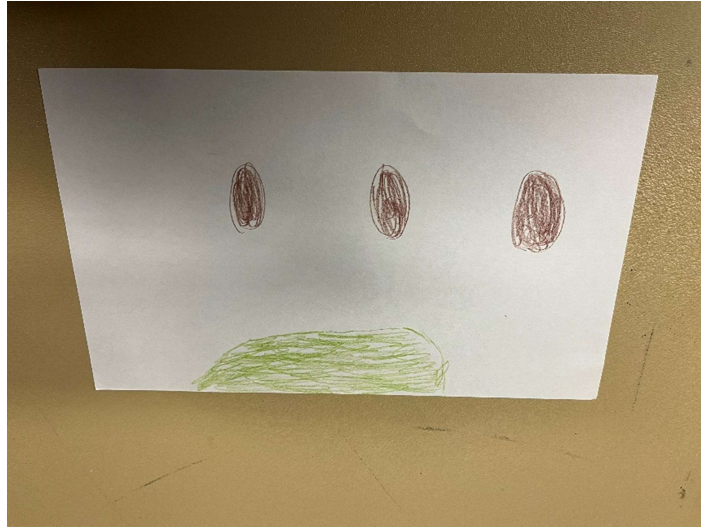

- Large piece of paper.
- Something to color with.

### **Procedure:**

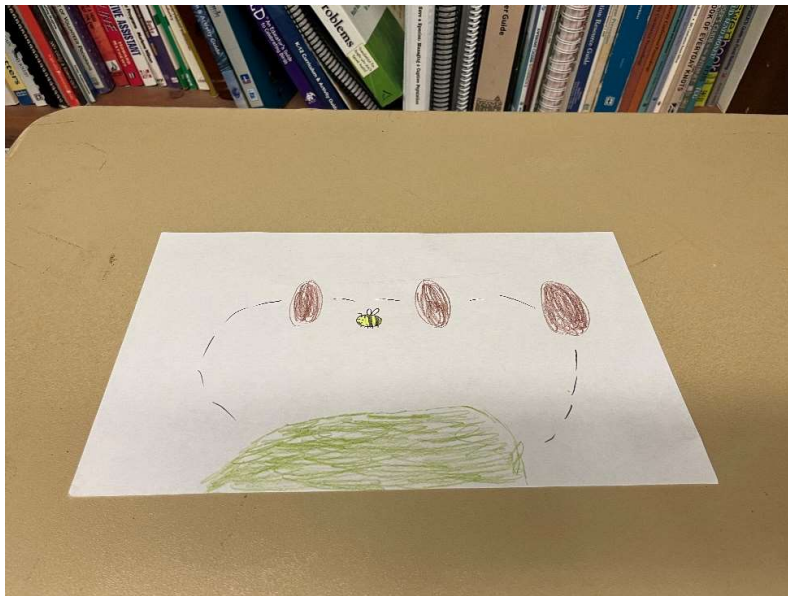

1. Go outside somewhere where you can see flowers and/or trees. This can be your own yard or a public park, whichever works best for you!
2. Pretend the outdoor area you're in is a city. Map out where you see different groups of flowers and trees. Mark trees and flowers with different colors.

June 2025 – Pollinators

3. Look at the different areas you've colored and the distance between them. Think about how pollen might get from one area to the other
4. Draw the creature you think would be best for carrying the pollen between the different areas  
Draw lines where you think the creature would travel most efficiently between the different areas.

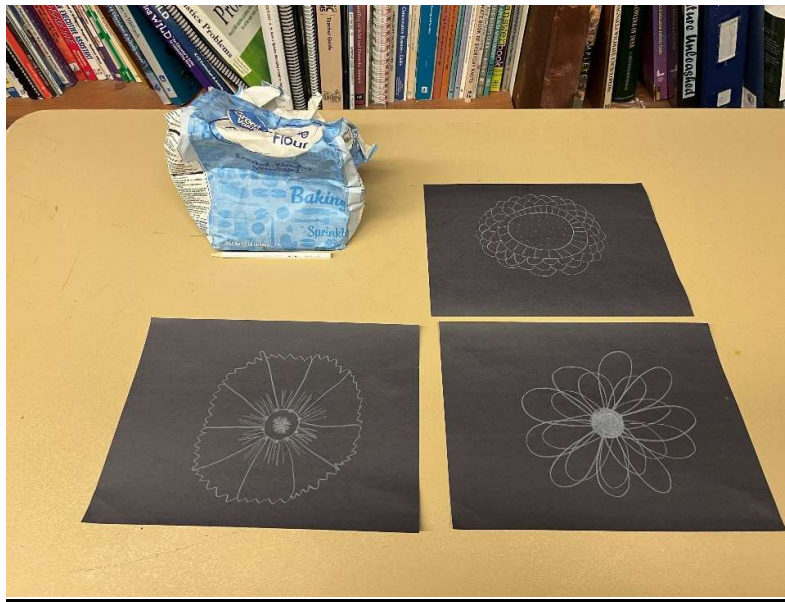

5. Good job! You've now made your own pollination city!

## Indoor Activity: Hand Pollination

This activity is meant to simulate how bees and other pollinators transfer pollen from plant to plant!

### Materials:

- 3-4 pieces of paper.
- Writing/coloring utensils.
- Powdered sugar or flour.
- Dark colored construction paper.

### Procedure:

1. Draw 3-4 flowers on separate sheets of black paper.
2. Put some flour or powdered sugar on one of your flowers. Stick your hand on top of it.
